

1 July 2009

**AN OPEN LETTER TO ALL PARTIES INTERESTED IN BESTNET EUROPE  
LIMITED AND ITS PRODUCT "NETPROTECT"**

Dear Sirs

***Bestnet Europe Limited and its product "Netprotect"***

We continue to act for Bestnet Europe Limited ("Bestnet") in connection with proceedings which were commenced in the High Court in London in January 2007 by Vestergaard Frandsen ("VF"). We have been asked to provide you with a further update on the situation now that the decision of the Judge in relation to the hearing which took place on 21 May 2009 is known.

We are pleased to confirm that having heard argument on both sides the Judge has not granted an injunction to restrain the manufacture and sale of the current product sold under the name Netprotect. It is important to note that the Judge did forbid the manufacture and sale of a product launched by Bestnet in October 2005 but he reiterated that the subsequent formulation submitted by Bestnet for WHOPEs II evaluation does not amount to a misuse of VF's trade secrets. In short, the only injunction in force prevents the sale of a product which is not being made or sold.

In accordance with the Judge's Order a short summary of the position will appear on Bestnet's website with a link to the judgement.

It is therefore still the case that there are no Court orders of which we are aware in any jurisdiction which prevent the manufacture and sale of the current version of Netprotect.

Yours faithfully

**McGuireWoods London LLP**
